

Change in the Public Sector

Change in the Public Sector has become a necessity but the satisfaction of general interest has to be preserved. It is a challenging equation.

Change, always means to: prepare a strategy, reengineer processes, plan and manage new budget approach and improve performance by managing projects of change.

	Strategy making	Business process reengineering	Audit of Fraud	Budget planning & management	Project management of performance
Public Administrations	✓	✓	✓	✓	✓
State of public bodies		✓	✓	✓	✓
Health & hospital management area	✓		✓	✓	✓
Sub national level of decentralisation			✓	✓	

Our consultants are perfectly aware and experienced in these matters. They are keen to share with you their skills in the fields that are fully familiar to them e.g. Public Administration, State and other Public owned Bodies, Health Sector & hospitals management ... at the National and sub-national levels.

The ticked intersections address the areas in which our consultants have already acquired proficiencies and credentials.

Each Sector presented above has its own specific issues of Public Service constraints and major stakes in relation with the overall policies.

More concretely, C2C® provides assistance when it comes to gathering professionalism and complementarities for overall improvement of efficiency:

- ⇒ Strategy making
 - Identification of objectives, stakes and risks
 - Assessment of threats and potential blockage
 - Priority making and proposing a pace of change
 - Investment plans
